CCT Changing

Dimmable

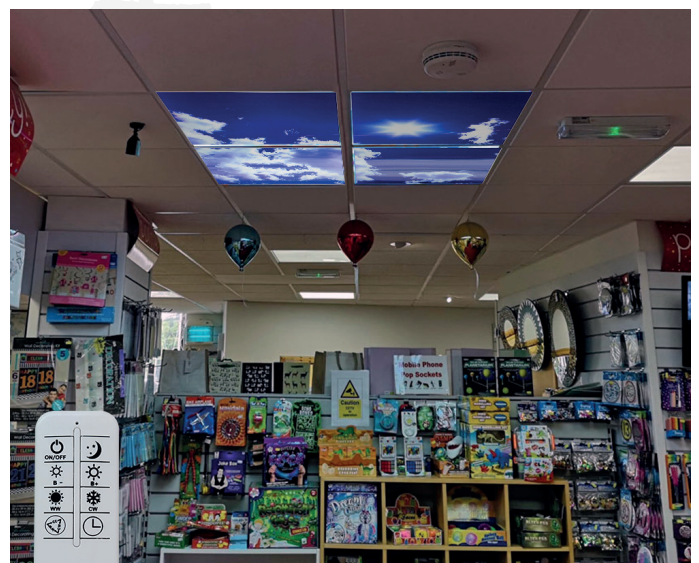

Description

Now you can create a realistic under cloud ambience. Change the colour temperature as well as Dim lights with a Remote on this 4 set 60x60cms LED Panels with 3D Effect.

- Hi-resolution Sky LED Light Panel with 3D Effect which gives you an impression that the clouds are moving. By coupling 6000K LED panels with a realistic high-resolution picture, you will really feel like you are working outside when you are actually inside!
- The colour temperature of our light matches daylight. This makes it feel like you are actually looking outside through a real window, and visitors and employees also experience the positive effects of daylight when they are inside.
- LED Sky Ceiling Panels fit into suspended ceiling grid systems using a 'plug and play' system that can be easily installed - the same as normal LED panels
- 595 x 595mm (to fit 600 x 600mm ceiling grid system).
- 120 degree beam angle. 2200 Lumens Per LED Panel
- Provide a wow-factor within your reception area, office, or even children's nursery!
