

How to Convert Your Home INTO A SMART HOME

Lightwave is the best choice because...

The easy-to-use App allows you to control all your lights, power sockets & heating devices from your smartphone, with your voice or directly on a physical device.

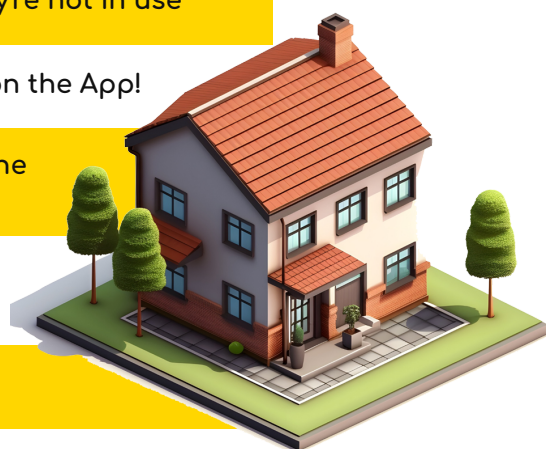

The link plus hub connects directly into your Wi-Fi network and can control over 100 devices

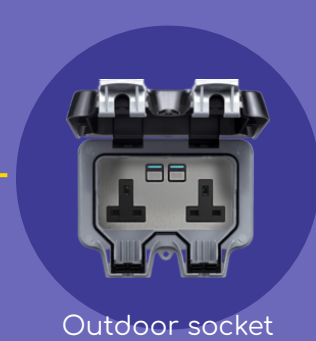

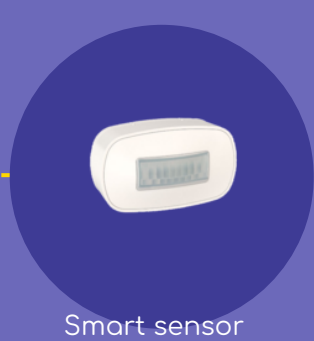

A few tips to make your home smarter:

Consider these automations...

- ✓ Set timer functions to switch off your devices when they're not in use
- ✓ Switch off the kids TV's when its bedtime and blame it on the App!
- ✓ Control every single electrical device in your home at the touch of a single button
- ✓ Monitor the energy usage of each individual device
- ✓ Activate multiple lights all at once with your voice

Other Add-Ons

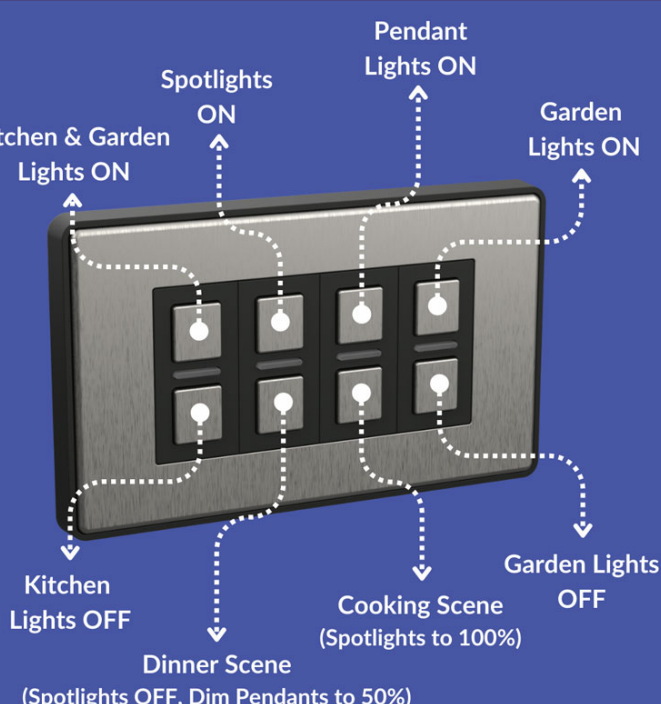

The Magic Button

Magic Button

Program a spare button

Program a spare button (or gang) via an automation and set any conjure up with!
