

Low Voltage Transformer 60W 12V Aurora Lighting

**Product Code:** EN-SC60**Stock Qty:** 1

Product Description

Cost effective low voltage transformer from the Aurora Enlite range that can be used with halogen and many MR11 or MR16 LEDs. Rated at 60 watts it is dimmable as standard. The small physical size of 40mm in width allows it to be fitted through smaller hole sizes.

Key Features

- Wattage: 60W / 60VA
- Minimum halogen wattage: 20W and 35W for dimming
- Voltage: Mains 230V input to 12V AC output
- Electronic transformer
- Overload and short circuit protection
- Soft start function that prolongs lamp life
- Dimmable with leading and trailing edge dimmers
- Product code: EN-SC60
- Manufacturer: Aurora Lighting
