

Remote Control for Ricoman Centorio Downlight

Product Code: AX500
Stock Qty: 23

Product Description

Centorio colour temperature adjustable handheld remote control. Allows the Centorio CCT downlight or Ricoman R3 to be colour temperature adjusted and dimmed using a handheld remote control. Has 4 separate channels that allows you to split up downlights in to groups (or zones). This allows you to use just one controller to control multiple downlights (up to 100).

The Centorio doesn't need this remote as it can be controlled by a wall switch but the remote allows you to control your downlights remotely which is a great feature regardless of the colour temperature adjust-ability.

Key Features

- Range: Up to 15M
- Can you control up to 100 downlights
- Battery powered (requires 2xAAA batteries)
- Changes colour temperatures
- Dims brightness
- Product code: AX500 (R09-882)
- Manufacturer: Ricoman
